

Curatorium
Template

Instructions for the Curatorium (Paper Terrarium)

1. Join the sections of the pattern, matching the triangles
2. Place the pattern on cardboard.
3. Cut out on the outside lines, using bulldog clips to secure the pattern in place while you cut.
4. Keeping the template in place, score the fold lines. Use a blunt pointed object (knitting needle or the back of a knife).
5. With the template still in place, fold all the fold lines.
6. Remove the template. Re-fold the lines crisply.
7. Use the triangular window template to mark the window cut-outs. The template should be centred in each panel, and positioned about 2 cm up from the base line.
8. Cut out the window with a craft knife or with scissors, by gently poking the scissors into the centre of the area to be cut-out, and then proceeding along the cut lines.
9. Place wood glue on the lower tabs, and glue underneath the base.
10. At this point, insert a button and thread if you would like to hang it.
11. Glue the final side tab into place.
12. Fill with delightfully curated items ☺
